

Please do not accept the Consumer Bankers Association petition to impose the federal "established business relationship" exemption on Indiana consumers. This would weaken Indiana's current laws protecting us from unwanted phone solicitation. We do not want solitation via telephone from businesses we currently have a relationship with any more than we want the other phone solicitations. That they fill our mailboxes with junk mail is more than enough for us and we don't want telephone calls to interrupt our family time. Thank you for your consideration in this matter.
